20. Where your data is kept
21. Using Moneta on a computer
22. Questions & problems
23. About the developer

1 What is Moneta?

Moneta is a money diary. You write down what you spend and what you earn, and Moneta shows you where your money goes.

- **Add a spend in seconds**, for example "Lunch ৳250", with a big number pad.
- **See your totals**: how much you have, and what you spent today, this week and this month.
- **Plan** with budgets ("max ৳2,500 for fun this month") and savings goals ("new laptop").
- **Never forget** bills, loans and money friends owe you.
- **Any currency**: Taka, Rupee, Dollar, Euro and many more, even mixed together.
- **You choose where your data lives:** in your account (the same data on every phone and computer), or only on this device without any account. You can switch any time.

> **Good to know**
> The pictures in this manual use sample ("demo") data and the Taka (৳) currency. Your screen shows your own numbers.

2 Get Moneta

Use it in a web browser, or install the Android app. Both look and work the same.

Option A: Website (any phone or computer)

1. Open **moneta-three-wheat.vercel.app** (or **moneta-th.vercel.app**) in Chrome, Edge, Safari or Firefox.
2. That's it. To keep it like an app, use the browser menu → **Install app** or **Add to Home screen**.

Option B: Android app (APK)

1. On your Android phone, open the website and tap **Download** on the "Get Moneta for Android" banner. You can also go to **Settings** → **Download Android app (APK)**, or download directly from GitHub Releases: github.com/towfiqbinhasan/Moneta/releases/latest
2. Open the downloaded file **Moneta.apk**.
3. If Android says *"For your security, your phone is not allowed to install unknown apps"*, tap **Settings**, turn on **Allow from this source**, then go back.
4. Tap **Install**, then **Open**.

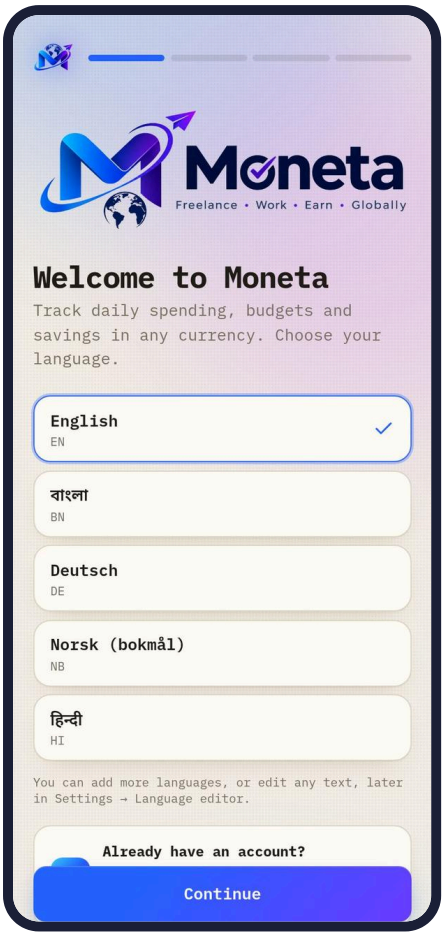

Updating the Android app

- **Safe in-place updates:** Moneta is signed with an official permanent release key. When you install an updated APK, all your local data, categories, and settings stay completely safe.
- **Automated Cloud Builds:** Every release is automatically built and tested through GitHub Actions CI/CD with verified Android SDK & Java environments.
- **Deep Linking:** The app includes native deep linking (`app.moneta.tracker://auth-callback`) so Google and email sign-ins return seamlessly back into the app.
- When a new version is out, a blue bar appears at the top: **New version available**. Tap **Update**, then **Install**.
- You can check yourself any time: **Settings** → **scroll to the bottom** → **Check for updates**.

> **Only download from the links above**
> Moneta APKs from other places may be fake.

3 First start: set it up in 1 minute

The first time you open Moneta, it asks 4 short questions.

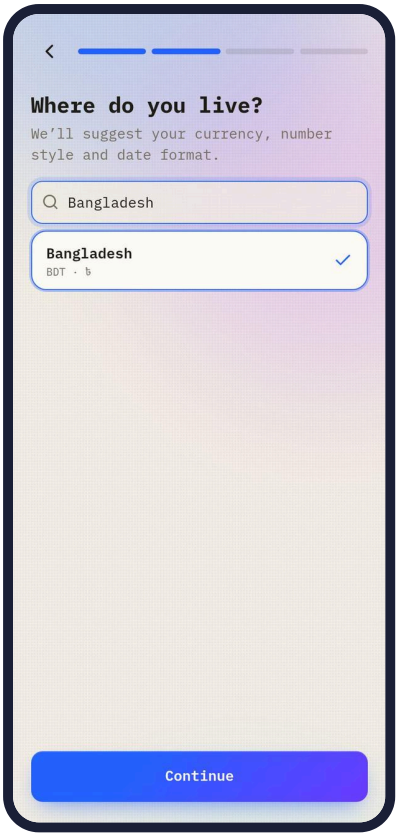

Step 1: language

Step 1: Choose your language

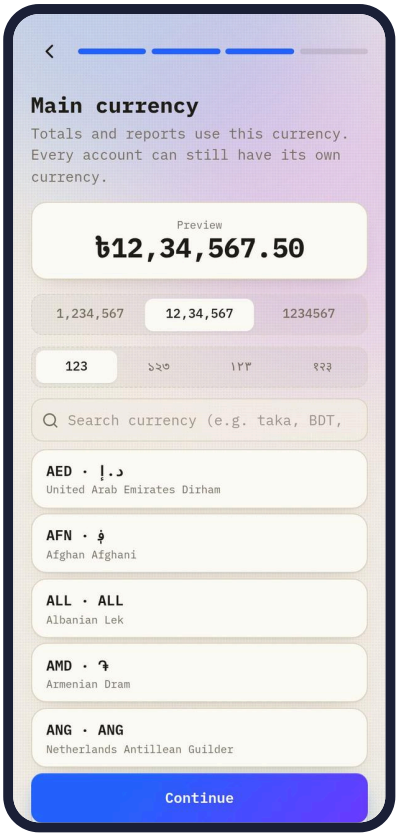

Tap **English**, **বাংলা**, Deutsch, Norsk or **हिन्दी**, then tap **Continue**. You can change it later.

First, the sign-in screen. Sign in (or create a free account) to keep your data in your account. If you already used Moneta on another device, all your data comes back and these setup steps are skipped. Don't want an account? Tap **This device only** below the sign-in box.

On the website you also see **Get Moneta for Android** here.

Step 2: country

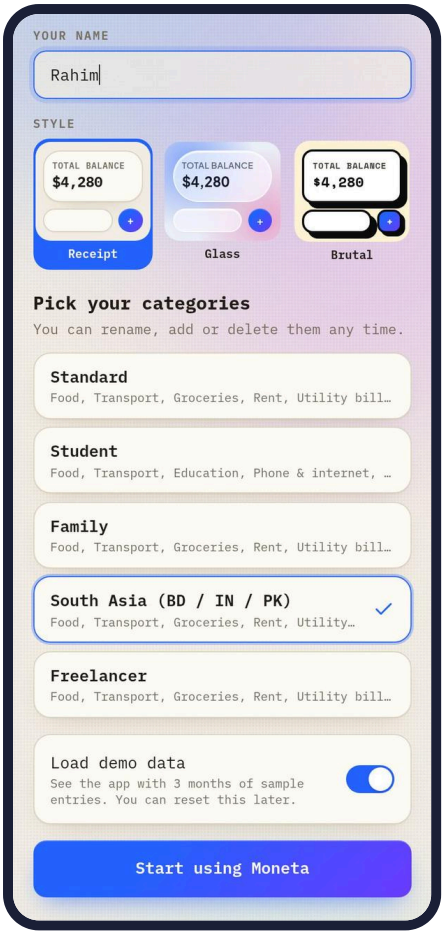

Step 3: money format

Step 2: Your country

Type your country (for example **Bangladesh**) and tap it. Moneta then picks your currency and date style for you.

Step 3: How money looks

The big preview shows how amounts will look. Choose how numbers are grouped (**12,34,567** is the lakh style used in Bangladesh and India) and the digits (**123** or **১২৩**). Tap **Continue**.

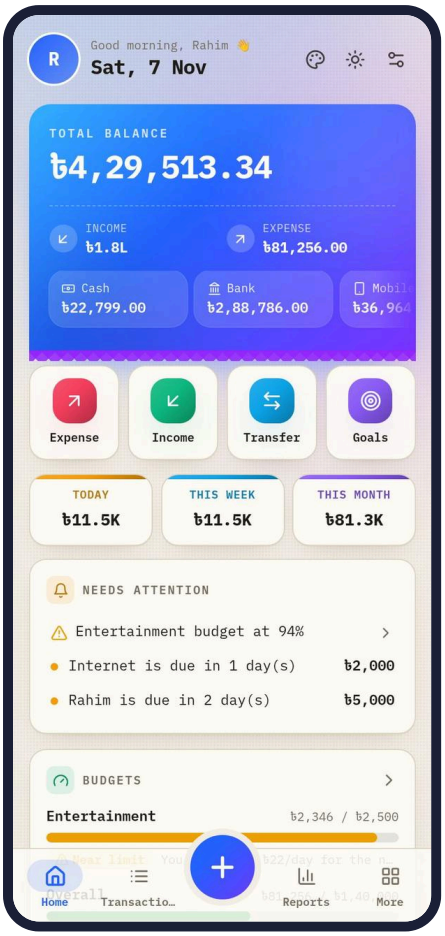

Step 4: make it yours

Step 4: Make it yours

1. Type your **name**. It is used in the greeting.
2. Pick a **style** (Receipt, Glass or Brutal). It only changes the look.
3. Pick a **category set**: Standard, Student, Family, South Asia or Freelancer.
4. **Load demo data**: turn this on only if you want to try Moneta with sample entries. You can remove them later (see Settings).
5. Tap **Start using Moneta**.

4 The Home screen

Everything important on one screen.

Home

1. **Top:** greeting and today's date. The 3 small buttons change the **style**, switch **light/dark**, and **choose what Home shows**.
2. **Total balance:** all your money together. Below it is the income and expense for this month, and each account (Cash, Bank…). Swipe the accounts sideways to see more.
3. **Quick buttons:** **Expense** , **Income** , **Transfer** , **Goals** .
4. **Today / This week / This month:** how much you spent.
5. **Needs attention:** budgets that are almost used up, bills due soon, and money due from people.
6. **Budgets** and more cards below. Scroll down.

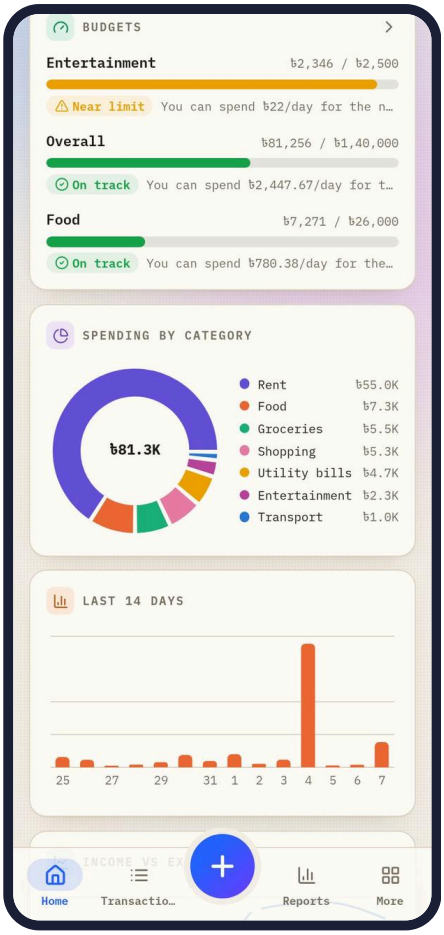

The bottom bar

Home · **Transactions** · the big **+** button (add an entry) · **Reports** · **More**

Further down

- **Spending by category** (which kinds of things cost you most).
- **Charts** of the last days and months.
- **This month vs last month** and simple tips.
- **Health score**: a 0–100 score for how well this month is going.
- **Goals** and your **recent entries**.

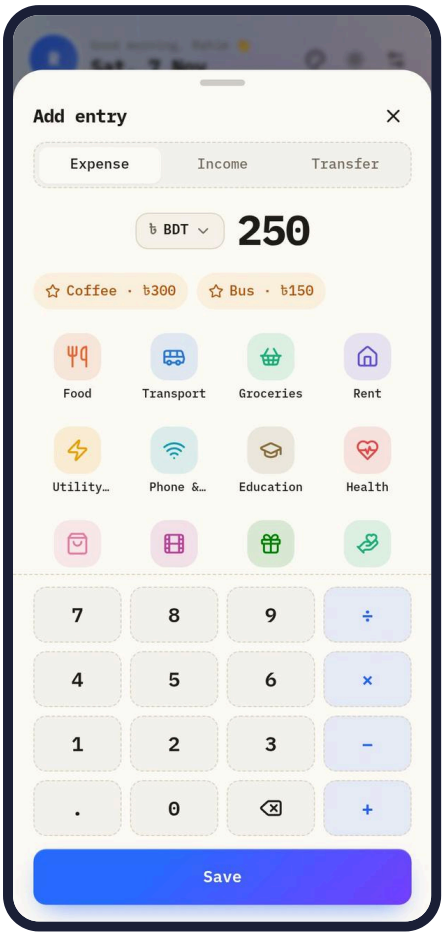

> **Tip**
> Don't need a card? Tap the sliders button at the top of Home (or **Settings → Dashboard widgets**) to hide it or move it.

Scroll down for more

5 Add money in or out

This is what you will do most. It takes about 5 seconds.

Add entry

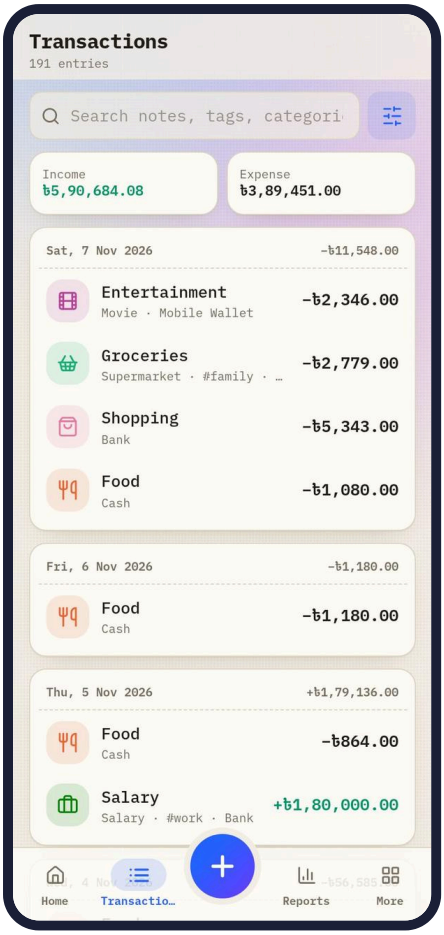

1. Tap the big blue **+** at the bottom.
2. Choose at the top: **Expense** (money out), **Income** (money in) or **Transfer** (moving money between your own accounts, for example Bank → Cash).
3. Type the **amount** on the number pad. You can even calculate: **120 + 80**.
4. Tap a **category** such as Food or Transport.
5. Tap **Save**. Done!

Extra options

- **Account:** choose Cash, Bank, bKash… (Moneta remembers your last one).
- **Currency:** tap **৳ BDT** to enter another currency.
- **Date, note, #tags, receipt photo**: open the details part below the categories.
- **Repeat** (for example every month) and **Save as template**.
- **Templates** (the ☆ chips like "Coffee ৳300") fill everything with one tap.

Made a mistake?
After saving, tap **Undo** on the message at the bottom. To change an entry later, tap it in the list. To delete it, open it and tap the bin, or swipe it to the left.

6 See all your entries

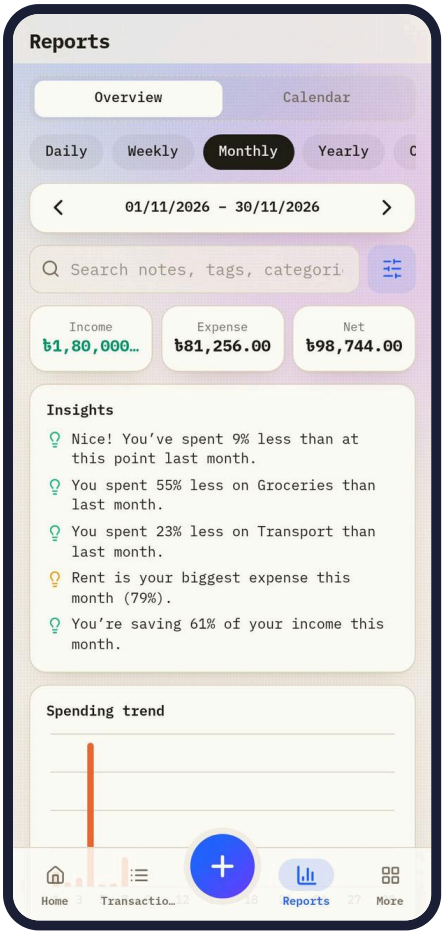

Transactions

Tap **Transactions** in the bottom bar.

- Entries are grouped by day, newest first.
- **Search** by note, tag or category, or use the **filter** button (date, account, category, amount…).
- **Tap** an entry to see or change it.
- **Swipe left** to delete (you can Undo). **Swipe right** to copy it as a new entry.

7 Reports

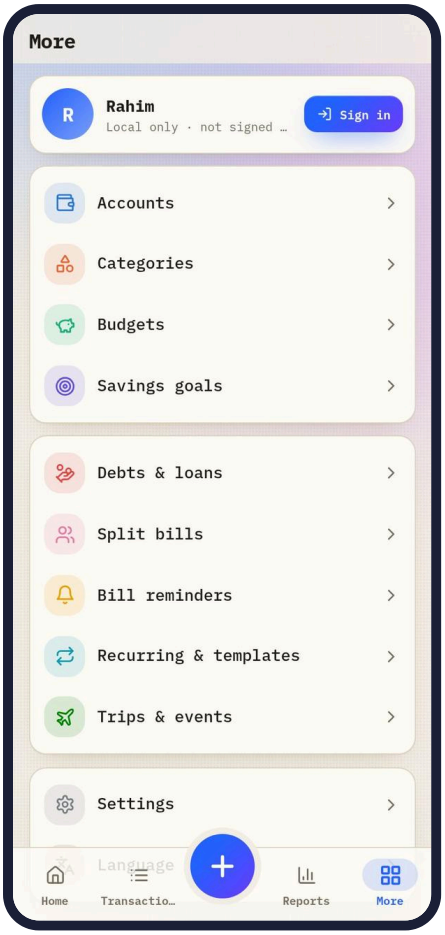

Reports

Tap **Reports** in the bottom bar to understand your money.

1. Choose **Daily, Weekly, Monthly, Yearly** or **Custom**.
2. Use **‹ ›** to move to the previous or next period.
3. See **Income, Expense** and **Net** (what is left).
4. **Insights** explain the numbers in plain words, like "You spent 9% less than last month".
5. Charts and a list by category are below.
6. **Calendar** at the top shows each day's spending as colours.

You can also **export** a report as **PDF, Excel or CSV** to print or share.

8 The "More" menu

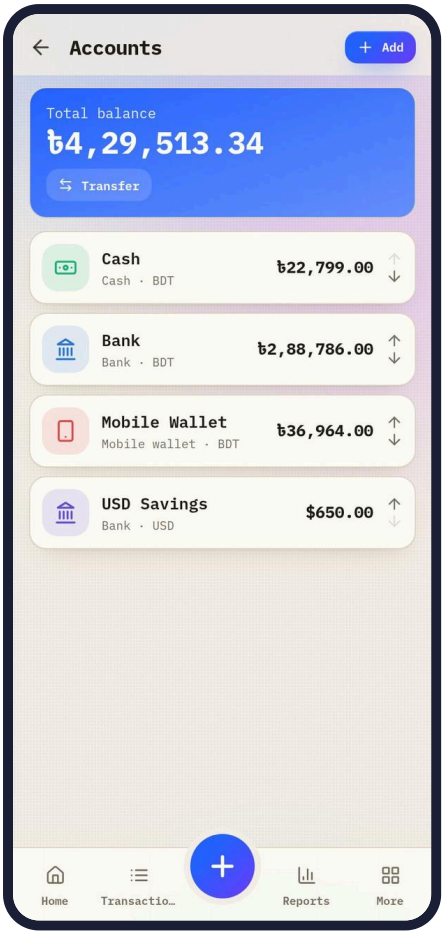

More

Tap **More** (bottom right) to reach every other part of Moneta.

ITEM	WHAT IT IS FOR
Accounts	Your wallets and bank accounts
Categories	The kinds of spending and income
Budgets	Spending limits
Savings goals	Money you are saving up
Debts & loans	Money you owe, or that is owed to you
Split bills	Share a bill with friends
Bill reminders	Rent, electricity, internet…
Recurring & templates	Entries that repeat by themselves
Trips & events	Spending for a trip or a wedding
Settings	Language, look, lock, backup, sign-in
Language editor	Change any text, or add a language
User manual	This guide

9 Accounts

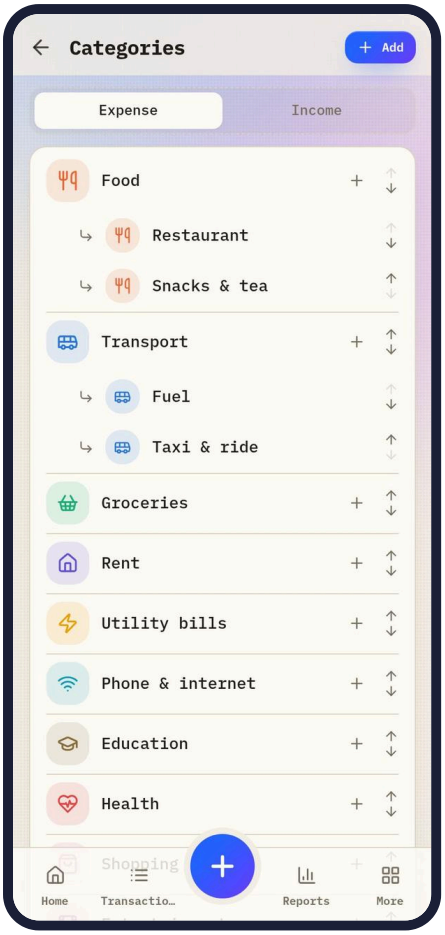

Accounts

An account is any place you keep money: Cash, a bank, a card, bKash, Nagad, PayPal…

1. Go to **More** → **Accounts**.
2. Tap **+ Add**, type a name, pick a type, currency, icon and colour.
3. **Opening balance:** how much is in it right now. Moneta adds and subtracts from there.

- Tap an account to change it.
- **Archive** an account you don't use any more. Its history stays.
- The **total** at the top is all accounts together, in your main currency.

10 Categories

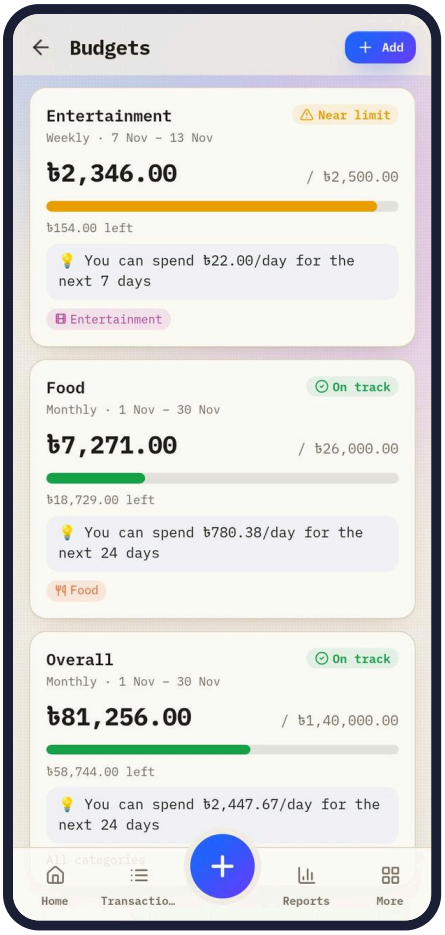

Categories

Categories are the kinds of spending (Food, Rent…) and income (Salary…).

- **Add:** tap **+ Add**, give a name, icon and colour.
- **Sub-category:** choose a "parent", for example Food → Restaurant.
- **Rename, recolour or delete:** tap a category.
- **Change the order:** use the arrows.
- **Load a category set** adds a ready-made set (Student, Family…).

> **Deleting is safe**
> Entries in a deleted category are kept. They become "Uncategorised", or move to the parent category.

11 Budgets

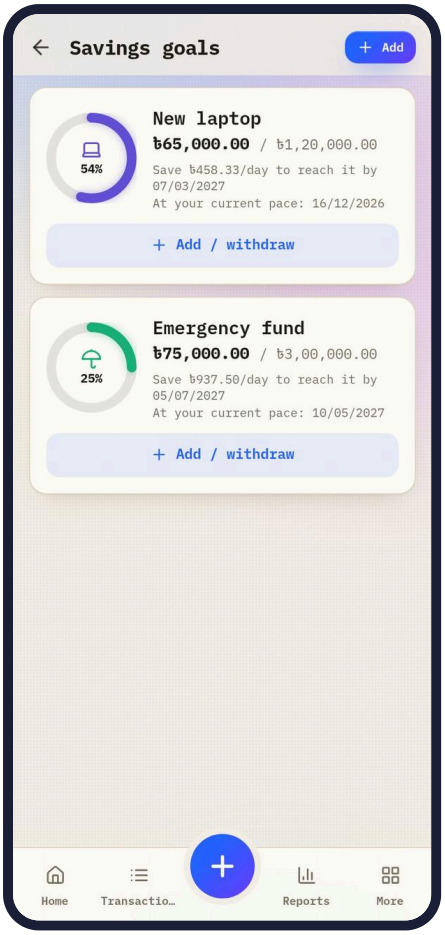

Budgets

A budget is a spending limit, for example "Food: ৳8,000 per month".

1. Go to **More** → **Budgets** → **+ Add**.
2. Choose **how often** (daily, weekly, monthly, yearly), the **amount**, and **which categories**. Leave categories empty for an **overall** budget.
3. Save.

- **Green** = fine, **yellow** = near the limit, **red** = over.
- Moneta tells you **how much you can still spend per day**.
- **Rollover:** money you did not use is added to next month.

12 Savings goals

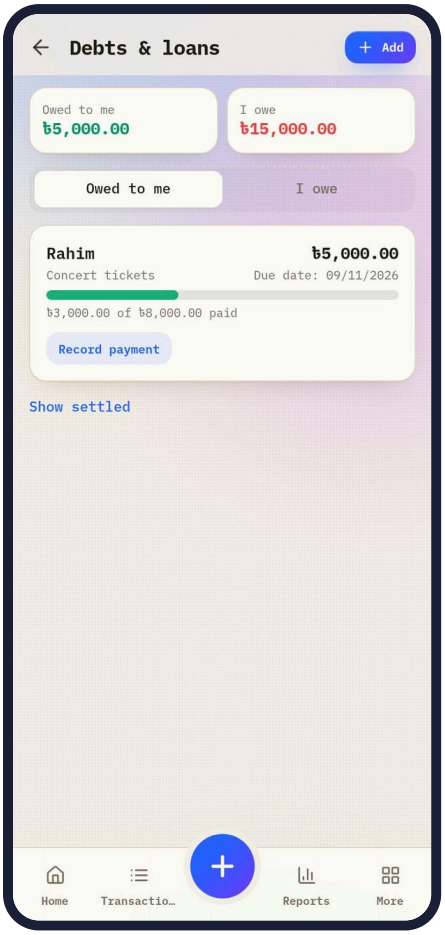

Savings goals

Save for something: a laptop, an emergency fund, Eid shopping…

1. **More** → **Savings goals** → **+ Add**. Enter the name, target amount and (optional) the date you want it by. You can add a picture.
2. When you put money aside, tap **+ Add / withdraw** on the goal.

- The ring shows how far you are (for example 54%).
- Moneta tells you **how much to save per day** to make it in time, and **when you will reach it** at your current speed.
- You get a small celebration at 25%, 50%, 75% and 100%. 🎉

13 Debts & loans

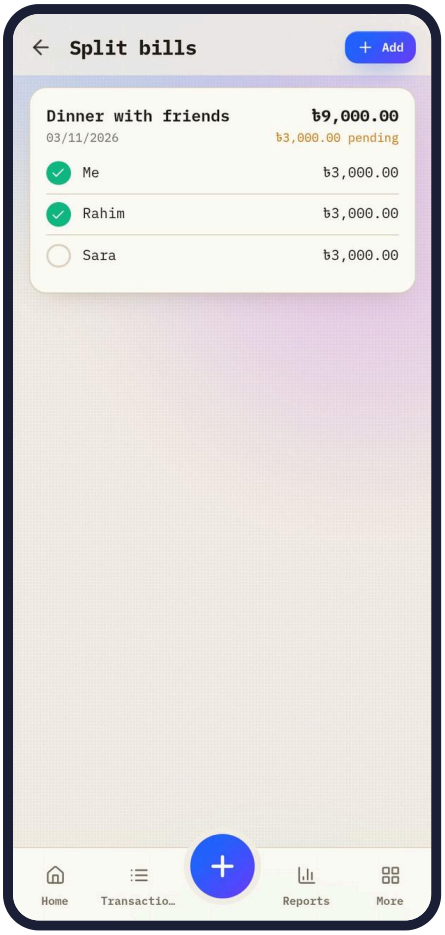

Debts & loans

Keep track of money you lent or borrowed.

- Two tabs: **Owed to me** (people owe you) and **I owe**.
- **+ Add:** person, amount, due date, note. Turn on **Remind me** to get a reminder near the due date.
- When someone pays back (all or part), open it and tap **Record payment**.
- When everything is paid, it is hidden from the list. Tap **Show settled** to see it again.

14 Split bills

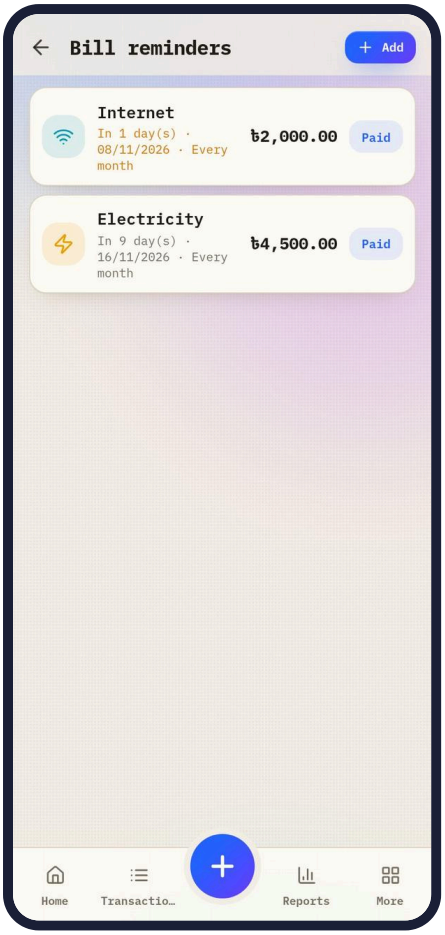

Split bills

Paid for dinner with friends? Split it fairly.

1. **More → Split bills → + Add**.
2. Enter a title and the total, and add each person.
3. Choose **Split equally** or **Custom amounts** (type each person's share).
4. Tick who has **already paid**.
5. Keep **Add unpaid shares to "Owed to me"** on, and everyone who has not paid is added to Debts automatically.

15 Bill reminders

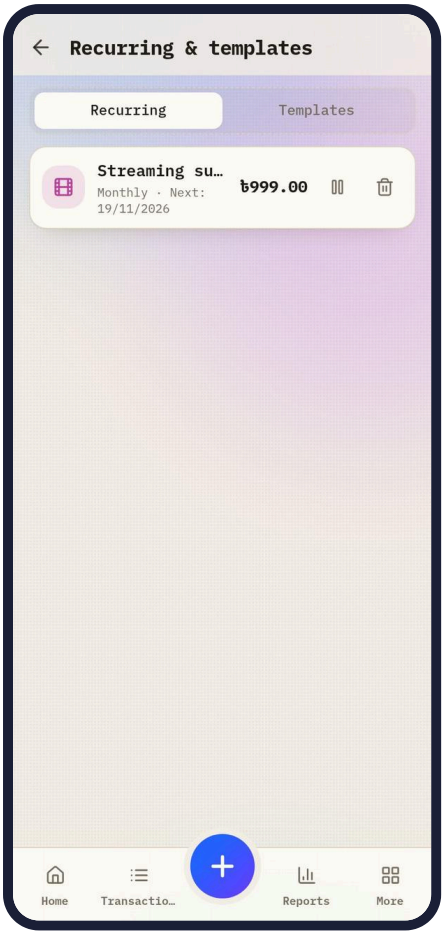

Bill reminders

Never miss rent, electricity, internet or school fees.

1. **More** → **Bill reminders** → **+ Add**: name, amount, due date and how often it repeats.
2. Bills due soon appear on **Home** → **Needs attention**.
3. When you pay, tap **Paid**. Moneta adds the expense for you and moves the due date to the next month.

16 Repeating entries & templates

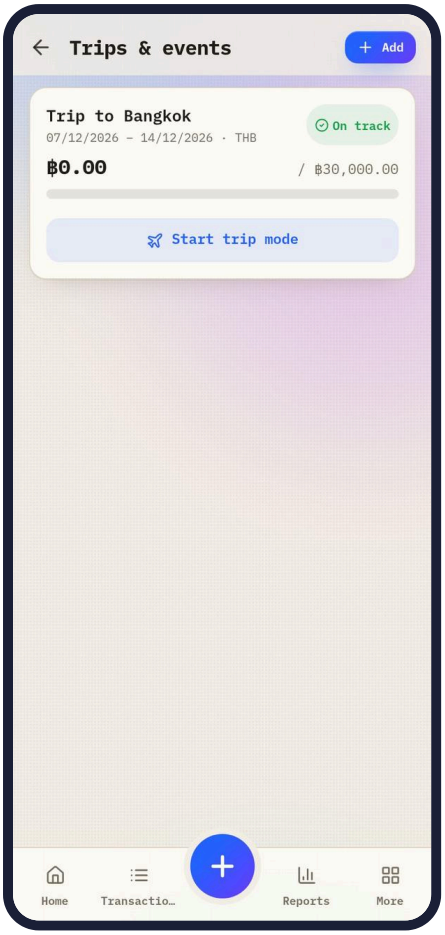

Recurring & templates

Let Moneta add regular entries for you.

- **Recurring:** salary, rent, subscriptions… When adding an entry, choose **Repeat** (daily, weekly, monthly, yearly). Moneta then adds it by itself on each date, even if you did not open the app that day.
- Here you can **pause** (⏸), **edit** or **delete** a repeating entry.
- **Templates:** saved entries (like "Bus ৳150"). They appear as ☆ chips when you add an entry. One tap fills everything in.

17 Trips & events

Trips & events

Going on a trip, or planning a wedding? Keep its spending together.

1. **More** → **Trips & events** → **+ Add**: name, currency (for example Thai Baht), budget and dates.
2. Tap **Start trip mode**. While a trip is on, a coloured bar shows at the top, and every new entry belongs to the trip and uses its currency.
3. See the trip's total, and how it compares to the budget.
4. Tap **Stop trip mode** when you are home.

18 Settings

Go to **More** → **Settings**. Here are the parts most people use.

Settings: top

Language

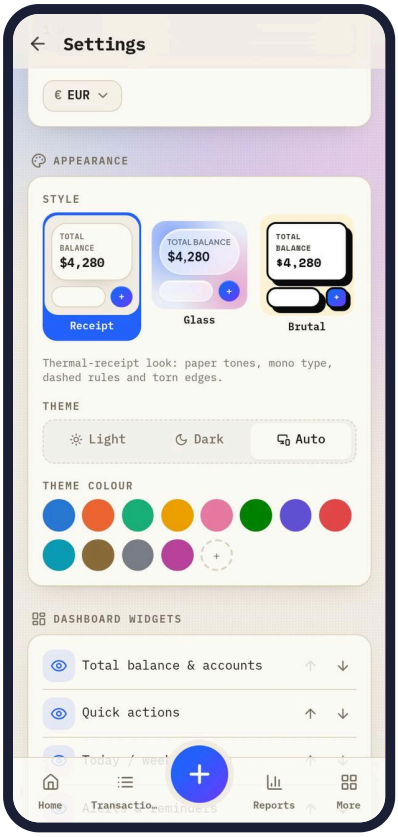

Change the language any time. Bangla, Hindi, German and Norwegian are included.

Currency & format

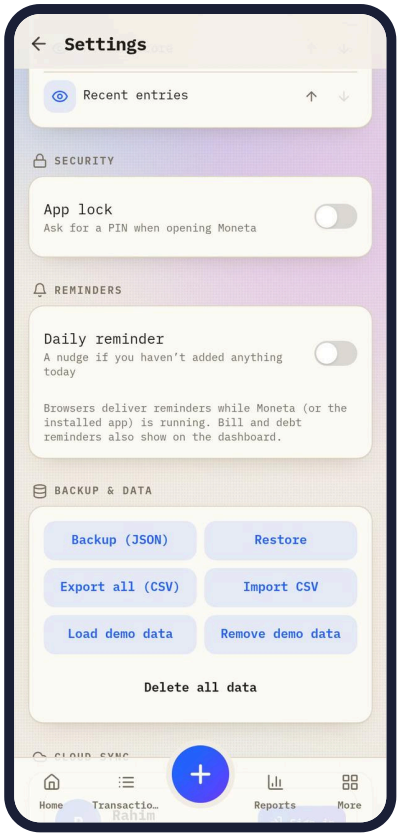

Your **main currency**, the number style (lakh or million), the date format, the first day of the week, and the **month start day** (useful if your salary comes on the 25th).

Exchange rates

Moneta gets today's rates from the internet to convert other currencies. You can type your own rate too.

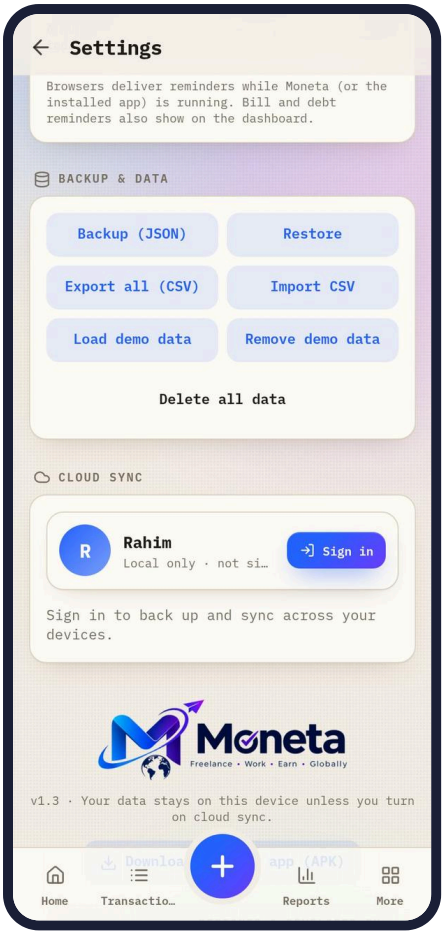

Look, profile and dashboard

App lock and reminders

- **Appearance:** style (Receipt / Glass / Brutal), Light, Dark or Auto, and your favourite colour.
- **Profile & Photos:** your name and avatar picture. Pictures (avatars and expense receipt photos) are compressed automatically on your device into compact Base64 format (under 30 KB). They open instantly with zero loading delay and require no expensive external cloud storage!
- **Dashboard widgets:** show, hide and reorder the cards on Home.
- **App lock:** ask for a **PIN** (4–6 digits; fingerprint or face also works if your device supports it) every time Moneta opens. Choose a PIN you will remember!
- **Daily reminder:** a notification at your chosen time if you have not added anything that day.

Backup & data

Backup & data

BUTTON	WHAT IT DOES
Backup (JSON)	Saves **everything** into one file. Keep it on Google Drive or your computer.
Restore	Brings back a backup file. It **replaces** the current data.
Export all (CSV)	All entries as a spreadsheet (Excel, Google Sheets).
Import CSV	Bring in entries from a bank statement or another app.
Load demo data	Adds 3 months of sample entries to try the app.
Remove demo data	Removes **only** the sample entries. Your own entries stay.
Delete all data	Erases the data on this device (with an account it also signs you out, and the account keeps its copy). You must type DELETE to confirm.

Make a backup first
"Delete all data" and "Restore" cannot be undone.

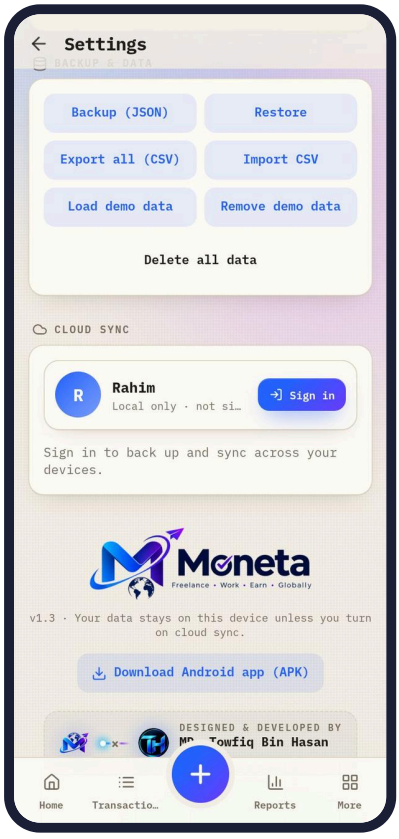

19 Sign in & use on many devices

With an account, everything you add is saved in your account, so you can sign in on **any** phone or computer and see the same data. Changing or losing a phone does not lose your data.

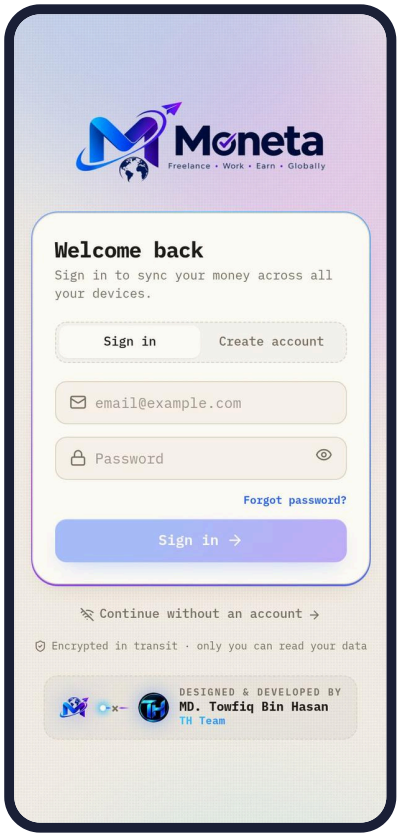

Choose: account or this device only

Settings → Cloud sync → Where is your data saved?

- **Cloud (your account):** saved in your account and on every device you sign in on.
- **This device only:** no account. Data stays on this phone or browser only.
- Switching to **cloud** asks you to sign in, then uploads this device's data to your account. Switching to **this device only** signs you out but keeps all data on this device.

Settings → Cloud sync

Sign in / create account

1. Go to **Settings** → **Cloud sync** and tap **Sign in**.
2. New here? Tap **Create account** and enter your name, e-mail and a password. Then open the e-mail Moneta sends you and tap the link to confirm.
3. Already have an account? Enter your e-mail and password and tap **Sign in**, or use **Google** if you see that button.
4. On your other phone or computer, sign in with the **same account**. Your data appears there too, and every change shows up on all devices within seconds.

- **Forgot your password?** Tap **Forgot password?** and enter your email. Moneta sends a password reset link pointing directly to your live app (e.g. `moneta-three-wheat.vercel.app`). Tap it on your phone or computer to set a new password, then log back into the app smoothly.
- **Realtime Multi-Device Sync:** Every change you make on your phone (like adding an expense) instantly syncs to your desktop browser and vice versa via Supabase Realtime without manual refreshing.
- **Sync status** shows at the top (computer) and in Settings: *Synced*, *Syncing…* or *Offline*. Offline is fine: changes are saved locally and sent automatically when the internet is back.
- **Sign out:** tap your picture → **Sign out**. Moneta first uploads your latest changes, then removes the data from this device only. Sign in again (here or anywhere) to get it all back.

20 Where your data is kept (Local-First Privacy)

Moneta uses a modern **Local-First architecture**. Your device is the primary home for your data, giving you instant speed and complete offline freedom.

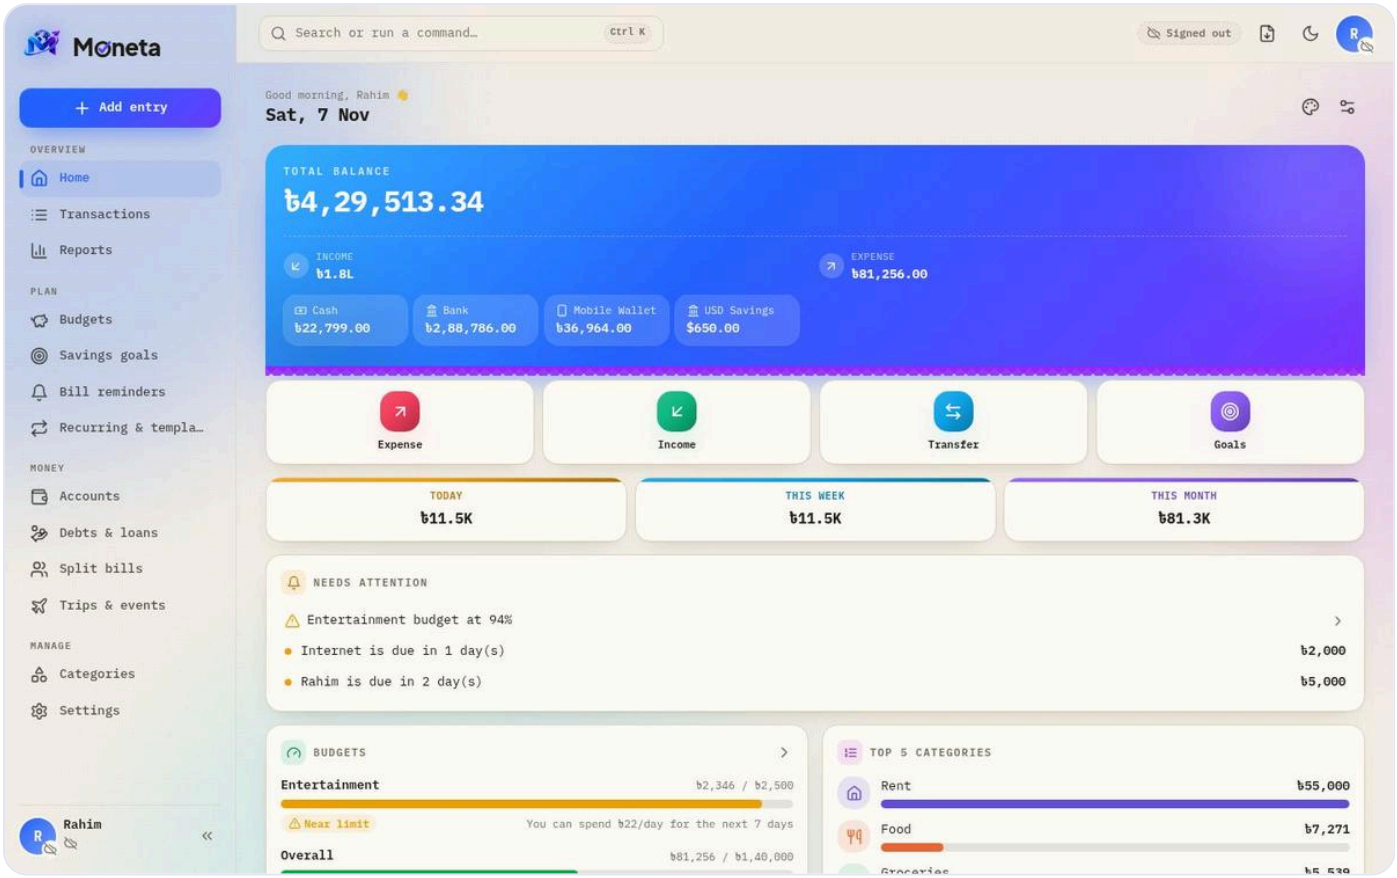

WHERE	WHAT IS KEPT THERE
This phone / browser (IndexedDB)	**Your local database:** 16 structured tables storing all transactions, categories, budgets, and compressed photos right inside your device's memory. Works 100% offline with zero latency.
Your account (Supabase Cloud)	**Your secure encrypted mirror:** Backs up your entries, accounts, budgets, goals, and settings. Protected by Postgres Row-Level Security (RLS) so only your authenticated user ID can access it.
App Lock PIN (Local only)	**Never uploaded to cloud:** Your security PIN and biometric keys stay strictly locked inside your device for maximum privacy.

Keep your money diary safe

- **Tombstone delete protection:** When you delete an item, Moneta logs a smart deletion marker so multi-device sync never accidentally revives deleted data.
- Your account already keeps a copy. A **Backup** file now and then is still a good extra safety net.
- Turn on **App lock** if other people use your phone.
- Moneta never asks for your bank password or card number. It only stores what you type into it.

21 Using Moneta on a computer

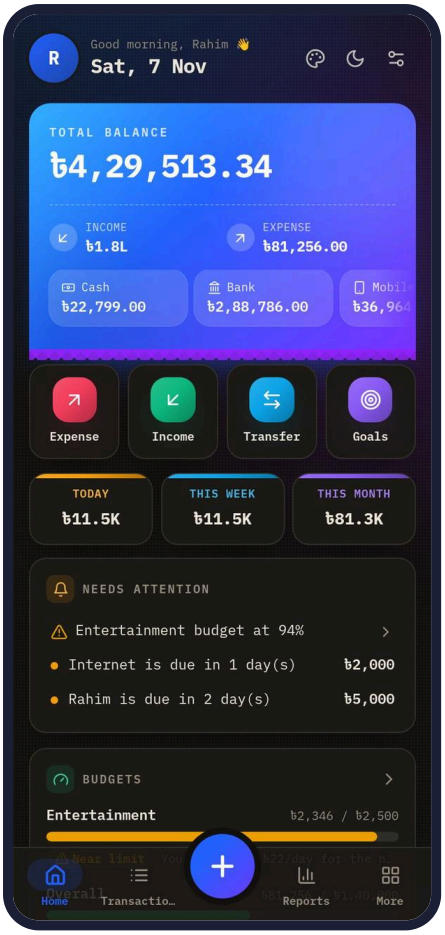

On a big screen Moneta shows a menu on the left and more cards side by side.

Moneta on a laptop or desktop

- **Search box at the top** (or press `Ctrl` + `K`): jump to any page or find any entry.
- **Drag & drop** a CSV file to import it, a backup file to restore it, or a photo to attach it as a receipt.
- In **Transactions** you get a table: click the column names to sort, tick many rows to change or delete them at once.

KEY	DOES	KEY	DOES
`N`	New expense	`D`	Dark / light mode
`I`	New income	`Ctrl` + `K`	Search & commands
`T`	New transfer	`?`	Show all shortcuts
`G` then `H`	Go Home	`Esc`	Close a window

Dark mode

Dark mode

Easier on the eyes at night. Tap the sun/moon button at the top of Home, or choose **Settings** → **Appearance** → **Dark**. **Auto** follows your phone's setting.

22 Questions & problems

QUESTION	ANSWER
Do I need internet?	No for "This device only". With an account, only to sign in the first time on a device; after that Moneta also works offline and uploads your changes later.
Is it free?	Yes.
I added something wrong.	Tap the entry in **Transactions**, fix it and save. Or delete it (swipe left).
My balance looks wrong.	Check the **opening balance** of each account (**More** → **Accounts**), and that transfers go between the right accounts.
How do I remove the sample data?	**Settings** → **Backup & data** → **Remove demo data**.
I forgot my App lock PIN.	With an account: reinstall the app (or clear the site data) and sign in again, everything comes back. Without an account, the data can't be opened without the PIN, so choose one you remember.
Reminders don't show.	Allow notifications for Moneta in your phone's settings. In a browser, reminders only come while Moneta is open.
The Android app won't install.	Allow "Install unknown apps" for your browser or Files app (see section 2).
Will updating the APK delete my data?	No! The APK is signed with a permanent cryptographic key, so updates install directly over your existing app without touching your data.
How does password reset work?	Tap **Forgot password?** on the login screen. It sends a secure email link directing you to your live web app where you can set your new password, then sign right back into the mobile app.
Why do profile pictures and receipts work offline?	Photos are compressed into lightweight Base64 strings right on your phone, so they load in zero seconds even with no internet connection.
I have a new phone.	With an account: install Moneta and sign in, everything is there. Without an account: make a **Backup** on the old phone and **Restore** it on the new one (or switch to Cloud first).

Data is missing on my other device.	Make sure both are signed in to the **same** account and connected to the internet. Then tap **Settings** → **Cloud sync** → **Sync now**.
